Customer Bulletin

Bulletin No: 09-0701
Date: July 1, 2009
Attn: Valued OEM Customer
Subject: R99, R209, R309 Fairing Material Change
Effective: July 2009

R99, R209, R309 High-Performance Fairing Material Change

Airmar has modified the High-Performance Fairing material for our R99, R209, and R309 transducers. Effective in July 2009, we will begin shipping these transducers with solid blue polyurethane fairings. The size, shape and overall dimensions of the new fairing remains the same as the foam-filled models. Therefore, no product qualification is needed. The images below show the difference in appearance between the existing foam-filled fairings and the new solid blue polyurethane fairings. This change only affects R99, R209 and R309 models.

Existing Fairing (foam-filled)

New Fairing (solid)

If you have any questions, please contact your Airmar sales representative at 603-673-9570 or email sales@airmar.com

Best regards,
Airmar Technology
