Bulletin No: 10-0719  
Date: January 19, 2011  
Attn: NMEA Electronics Installers  
Subject: Airmar 1kW Fairing Rebate  
Effective: January 19, 2011

## **Fairing Rebate Bulletin For Airmar 1kW B258, B260, SS260, & SS270W Transducers**

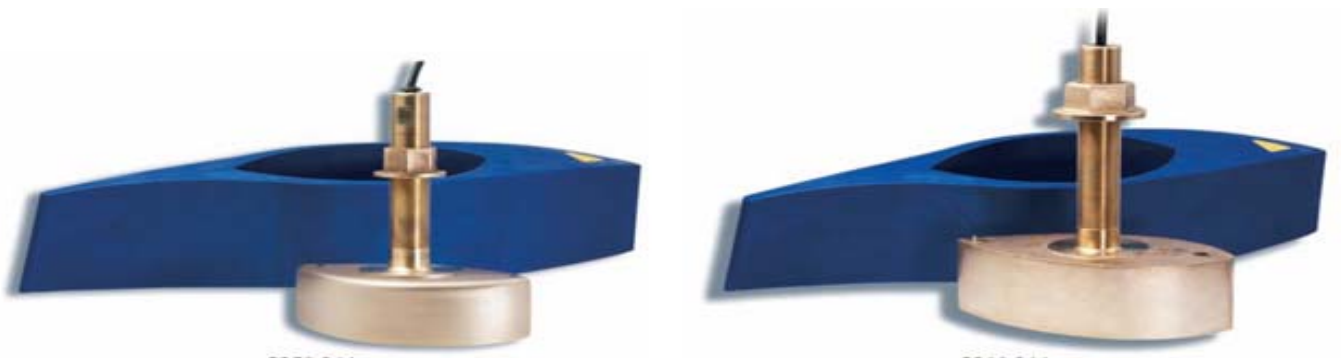

Airmar offers a fairing rebate for un-used 1kW High-Performance fairings. If you are a boat builder and have designed a transducer pocket in the boat's hull, you can take advantage of our rebate program. Additionally, if you are a professional installer and will be fibreglassing the transducer into the hull, you are also eligible for this rebate.

If the transducer is not being installed as described above, a High-Performance Fairing should be used in order to achieve maximum transducer performance.

Before sending the fairings back to AIRMAR, please contact us at 603-673-9570 and ask for a member of the sales department for an RMA number.

A rebate check of \$34.00 USD per fairing will be issued providing the following criteria is met;

- A minimum of 6 fairings are needed to qualify for this rebate.
- The fairings must be in new condition (free from scratches).
- An un-opened bolt bag must be included with each fairing.
- The installer pays shipping of the fairings back to Airmar.

If you have any questions, please contact Airmar at 603 673 9570 or email [sales@airmar.com](mailto:sales@airmar.com)  
Best regards,
